Microsoft has discounted the Surface 3 to a mere \$369 if you are looking for a certified refurbished tablet from Microsoft. Keep in mind that this isn't the "Pro" version. As such, this still has a great screen, but the processor has been stripped down to an Atom processor. Still, the 128GB version comes with Windows 10, 4GB of RAM and more for an attractive price. If bargain prices are your thing, the 2GB RAM 64GB storage version is only \$299.

Sporting a quad-core Intel Atom processor, Surface 3 has the power to run your favorite apps and desktop software, including iTunes and Photoshop Essentials1- just like a laptop. Click in a backlit keyboard (sold separately) to type faster than onscreen, and easily connect accessories with the USB 3.0 port.
