---

If you've been wanting to get a smart-watch, but haven't been able to drop the cash on one, there is some good news as Pebble has just slashed the prices on some of their earlier generation watches and they are now very affordable. If you like the bulky first-generation, it's only \$70. Even the color eInk Pebble Time is now just under \$100. There is not other smart-watch that will get you 7 days of battery life. I love my Pebble Steel and it is my go-to watch when I'm out and about.

*"It's that time of year: fall cleaning. And you know what we're cleaning? Out inventory. That means for a limited time you can grab you or your favourite person(s) one of these Pebble favourites for up to 40% off. Hurry though... we have limited quantities of these watches available."*
