We have posted a quick (well, somewhat) video of the interface of the TP-Link Archer C5400X MU-MIMO AC5400 Tri-Band Gaming Router. This video is simply a walk-through of the interface features and setup and shows off just what you are getting for your hard-earned money. The simple fact is that the router is incredibly powerful, extremely robust, blisteringly fast and wonderfully simple. That being said, take a look for yourself to see how it all shakes down and shapes up.

Many thanks to TP-Link for sending this product our way for a look!
