---

If you are looking for a new RAM kit for your system, [TweakTown starts us off small with an 8GB kit of G.Skill TridentX PC3-19200](#)

If you're looking for something a little bigger, the [GeIL EVO CORSA 16GB DDR3 2133MHz CL10 kit at Techwarelabs](#) may be more up your alley.

Let's face it, 16GB is probably enough for most people, but if you need more, the [32GB kit of G.Skill RipjawsZ PC3-17000 on the bench at TweakTown](#) should fill all your RAM needs - for a year or so.
