---

As we keep on going through the news bucket today, we've got a couple of Media Players that are interesting to check out. [NikkTech has the Egreat S-Series R300 Network HD Media player](#) on their bench as well as the Pivos Aios HD Media Center. Take a look if you're considering a new box to play your files on your favorite TV.

Unfortunately there's no HDMI cable included in the bundle, however it comes with pretty much everything needed included the aios HD media center, RCA cables (A/V), quick start guide, user's guide, USB host cable, AC power adapter, two AAA batteries, two HDD mounting screws and the remote control.
