I've long loved the Thinkpad line from Lenovo - before it was bought from Lenovo. I've had quite a few "Think" devices and my latest that I'm working on right now is the incredible X1 Carbon Gen 8. It's an incredible beast and mine came with a snappy Core i7 processor, 16GB of DDR4, 1TB PCIe SSD and the carbon-fiber cover with the 4K display. It's gorgeous. And powerful. Lenovo is trying to get me to covet already with a couple of their latest product announcements - the Carbon X1 Nano and the upcoming X1 Fold. I'm pretty happy with my current hardware, but if you're looking for the latest and greatest, check out the videos below and stay tuned for more.
