This shows what can be done on a limited budget. The first phase of this case mod cost me approx. \$50.00 in parts.

This is the rig I built for my wife after she outgrew the Xenabox. We tried to upgrade the mobo in that one

I didn't do anything really fancy with this case, yet. I just added a couple of 120mm 12v Panaflow Quiet f

Also I added two 80mm fans as well. One for intake on the side of the case, and the other exhausting ou

The Baybus enables you to just switch on the 80mm fans, or the 120mm fans, or both. For most things t

I decided to do something a little different with this Baybus. Along with the switches and LED's, I added a

I've updated this rig, with some paint and a window. Check out Rev.2 on the next page.

After a fair bit of complaining on how bland this case looks, I decided to spruce it up a bit. Same fans, ba

Here are some pics of the new look:

This was the first time, I'd painted a drive. It turned out not too bad.

This was the biggest Window I've ever put in a case prior and since. With a window that size it needs to
It's amazing what a little paint can do to make a case look better.
