The contest is **CLOSED!!!** Congrats to werty316 - the winner of the Avatar mouse from NZXT!

This month we are hosting a "**Show me yours and you can win mine**" contest.

BCCHardware.com and [NZXT](#) are proud to present our October Giveaway! The prize? The brand new NZXT Avatar Gaming Mouse! This mouse is designed for gamers and features an impressive 2600dpi resolution. It also has adjustable DPI on-the-fly. One beautiful thing about this mouse is that it is ambidextrous and works equally well for either "righties" or "lefties".

[More information can be found over at NZXT's website](#)

October Contest - NZXT Avatar Mouse!

How can I enter you ask? This contest is a little different than other ones here at BCCHardware. In order to get in to win, you'll need to send a picture of your old mouse and [post in this thread](#). Your picture counts as an entry and if you send in pictures of more than one mouse, they all count for entries in contest. For instance if you have an old "Zoltrix" ball mouse post that picture, you can still take a picture of your Logitech Mouseman Dual Optical mouse for another entry. Please keep one picture/entry per post.

Bonus!!! If you follow me on Twitter - www.twitter.com/bcchardw
[are](#), you will earn an extra 2 entries. Twitter me your forum handle so I can award you the extra entries! If you already follow me on Twitter, please send me your forum handle anyway to keep things simple for the tally process.

That's all, its that simple! Any other questions about this contest can be sent to admin@bcchardware.com

You'll need to be registered in the forum to take full advantage of

October Contest - NZXT Avatar Mouse!

Avatar Profile

Top Down View

Product Details:

- **Optimal performance** -- 2600 DPI Optical Sensor provides maximum sensitivity and responsiveness which yields unparalleled gaming accuracy. LED DPI indicator gives the user improved usage

and feedback. 5.8 Mega Pixels/second with a max frame rate of 6469 ensures smooth fragging and accurate sniping. 4 Speed DPI switch enables you to go from slow sniper movement to quick attack movement in a matter of seconds

- **Maximum Customization** -- 7 programmable keys allows gamers to customize their configuration specifically for First-Person Shooters, Real-Time Strategy, or Massive Multiplayer Online Role-Playing Games all within the macro and profile settings

- **Ergonomic Design** -- Ambidextrous design gives full use to both right and left handed gamers. Rubber grip helps avoid slipping during intense gameplay and the small, light form factor allows for faster and quicker movements, perfect for any gamer on the go or playing on a laptop or notebook. A slim form factor makes it the perfect choice for finger tip gamers.

- **Simple Installation** -- Avatar plugs into any available USB port
